## ANCHORS & FIXATIONS

# SpreadStop Hanger

Self-gripping Drywall Hanger

### Product Description

**SpreadStop Hanger** is the only true one-step self-gripping drywall hanger on the market. It eliminates the need for wall stud searching, measuring, marking or pilot-hole drilling; line up your work piece and drill away one-step, a few seconds, and you're done!

**SpreadStop Hanger** consists of three parts, a screw with hanger, a patented spread-stop nylon sheath, and a self-drilling tip. The self-drilling tip first makes a pilot hole, and guides our patented spread-stop nylon sheath through and threads in until flush against the wall. Continue drilling and you will notice a change in torque, which comes from the nylon sheath forming a locknut type fastener, shrinking in length but at the same time expanding in diameter, gripping firmly onto the drywall.

### Features & Benefits

- 1 / No pre-drilling required, a true One-Step installation
- 2 / Utilizes our Spread-Stop Technology, which forms a locknut type fastener and grips firmly onto your drywall.
- 3 / Patented design installs fast and easily in drywall.

### Perfect for

- Electrical boxes, picture hanging lighting fixture, shelving etc

### Products sizes & suitable drywall thickness

Size		Suitable Drywall Thickness		Clearance behind Drywall	
inch	mm	inch	mm	inch	mm
1/4 x 2-7/16	M6.3 x 62	Drywall 1/2	Drywall 12mm	1-7/8	48mm

### Load Capacities

Material	Size (inch)	Tensile max (lbs)	Shear max (lbs)	Tensile max (kg)	Shear max (kg)	Hold up to max	
						lbs	kg
Drywall 1/2	1/4 x 2-5/16	100	82	45	37	75	33

- 1 / The maximum hanging load is intended as a guideline only and cannot be guaranteed.
- 2 / Maximum load may be less, based on quality / thickness of drywall and dimensions of object being hung.
- 3 / Not recommended for ceiling applications.
- 4 / Industry safety standards recommend using only 1/4 of the maximum values as the safe working load.

### Product materials

Carbon Steel SAE1022 + Nylon

### Tools required

Screw Driver: #2 Phillips

### Installation instructions

1

Using a Phillips screwdriver or a Hand drill press SpreadStop Hanger slightly onto the drywall. Set hand drill at a low gear and clutch at 1/3 of the total Torque settings.

2

Apply pressure: turn SpreadStop Hanger until a pilot hole is made and the nylon sheath slips through. (DO NOT push with excessive force; let the self-drilling tip do its job)

3

Turn SpreadStop Hanger until flush against the wall and you feel a firm resistance.

4

Continue to turn until the SpreadStop Hanger starts spinning freely.

5

Hang Away!
